HANGCHA trucks conform to the European Safety Requirements.

XC Series 3-Wheel Electric Forklift Truck With Lithium Power

with capacities of 1,300 to 2,000kg

The World of Hangcha
SINCE 1956

HANGCHA

XC Series 3-Wheel Electric Forklift Truck With Lithium power

Covering models with a tonnage of 1.3t, 1.5t, 1.6t, 1.8t and 2.0t respectively, the new XC series three-point new energy electric forklifts are HANGCHA's dedicated-purpose battery forklifts subsequent to the XC series four-point dedicated-purpose battery forklifts.

Equipped with the dedicated lithium battery cells and modules for the XC series forklifts, which are developed jointly by HANGCHA and CATL, the truck has the features of high lifting speed, high driving speed, excellent ergonomic design, easy operation and high safety.

Excellent ergonomic design

/ The truck has a large operation space more than 50% larger than that of the traditional three-point electric truck.
/ The enlarged brake pedal and appropriate regenerative braking function can effectively reduce the driver's fatigue.
/ For the optional integrated fingertip operating system, the combined operation armrest integrates the emergency shut-off, horn and quadruple thumb switches, etc., is electrically controlled through the CAN bus, and is highly reliable.

Easy operations and maintenance

/ With the fully sealed hood and side plates, all major components including the electrically controlled components, motor, electrical components, etc. are sealed from dust and water.
/ Vulnerable parts and key parts are arranged reasonably to facilitate maintenance and repair.
/ The hood (with a self-locking gas spring) can be opened at a large angle facilitating the maintenance and replacement of the battery.

Advancement

/ The high-frequency MOSFET integrated controller ensures smooth and accurate driving and lifting control, and has excellent speed regulation performance, good performance of electronic control matching the motor, functions of regenerative braking, reverse braking and anti-sliding on ramps, etc., and high safety and reliability.
/ The ultra-high power AC drive motor has a bridge structure.
/ An ultra-high power AC oil pump motor is used. The system has high efficiency, complete protection functions, built-in speed and temperature sensors, and greatly improved reliability and life.
/ The noise can be as low as 73dBA.

Comfort

/ Owing to the low center of gravity and good stability, the driver feels comfortable during turning.
/ The intelligent sensing enables buffered descending. When the fork is 100 - 60mm away from the ground, the descending will automatically slow down, so that the goods and pallet will not hit the ground and the goods and ground can be protected effectively.
/ Silence, no pollution, energy saving and other advantages meet environmental protection requirements.
/ With friendly human-computer interfaces, the new large-screen LED instruments have good visibility and clear readings.

The dashboard in the driver's cab is placed overhead and can be seen when the driver lift her/his head, and the function buttons can be pressed easily

The packs can be easily removed by a manual or electric cart, and can be repaired and maintained conveniently

The wide-view mast with optimized design is unlikely to obstruct the operator's line of sight. The enlarged opening size of the fork carriage enables a wider view. The high fulcrum of the tilt cylinder enables better force bearing and more stable operation of the mast

The ergonomically designed tilt-adjustable small-diameter steering wheel makes the driver feel good

The seat can be adjusted back and forth by 210mm. The operator can choose the best driving position

Main Accessories

/ The main electrical components such as the motor controller, contactor, power plug, emergency cut-off switch, dashboard, accelerator, are all products of well-known foreign brands.
/ The emergency cut-off switch equipped for the standard configuration complies with European safety regulations.
/ Electronic and hydraulic overload protection devices.
/ The truck has passed the CE certification.

Standard Specification

/ Dual AC drive motors
/ High-power AC oil pump motor
/ Silent gear pump
/ Multi-function color screen instrument cluster
/ Large integral rubber pedal pad
/ Stamped iron hood, stamped iron side plates
/ Stamped stainless steel boarding step
/ Handbrake with a touch-proof mechanism
/ Turning deceleration function
/ Cloud smart module
/ Fork descending buffering
/ SPE power selection
/ Mileage display, operating time display
/ Integrated fuse box
/ DC-DC converter
/ Doublet multiway valve
/ Emergency shut-off switch
/ Reversing buzzer
/ Traction pin
/ Load sensing steering system
/ Standard duplex mast, fork, fork carriage and load backrest
/ Lithium packs with low temperature electric heating systems
/ The gas spring of the hood with a touch-proof mechanism
/ LED combination headlights, LED combination three-color tail lights
/ Charging muzzle meeting national standards

Safety

/ The optional descending lock function can disable the descending function when the driver leaves the seat, and enable high safety.
/ The standard configuration provides a fork descending buffering function. In addition, an optional electronic control function for buffering the fork's ascending is provided to protect the goods from falling and damaging the ground.
/ The handbrake can be optionally equipped with an alarm buzzer to prompt the driver to pull up the handbrake before leaving the truck.
/ Three horn buttons are provided, which are respectively on the driver's steering wheel, thumb switch equipped armrest (optional) and reverse armrest (optional), for alerting and protecting the surrounding people.
/ A PIN code should be provided before entering the system. 99 sets of PIN codes are available for the administrator. The truck is highly secured and irrelevant personnel cannot start the truck.

Options

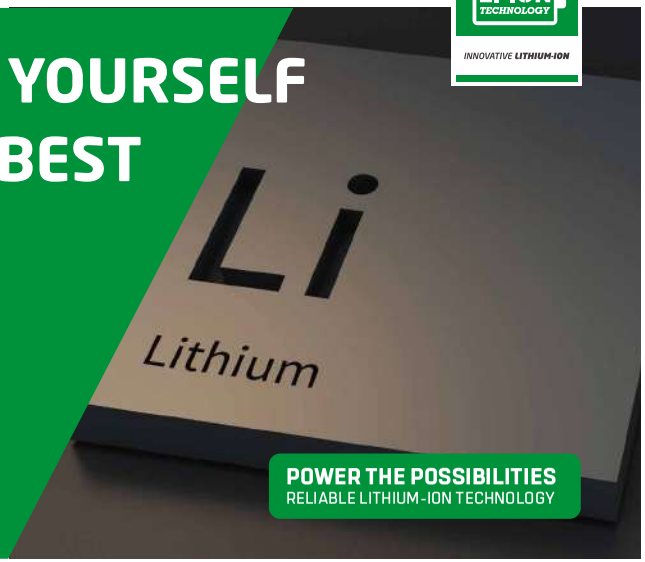
/ Lithium packs that can be replaced quickly
/ Start with a PIN code or by swiping a card
/ Ultra-elastic solid nose tire
/ Environmentally-friendly colored solid tire
/ Left and right rearview mirrors
/ Reversing video
/ Front/rear blue lights
/ Rear operation lights
/ Cold storage truck
/ Reverse armrest (containing a horn button)
/ Fully enclosed cab
/ OPS seat sensing function
/ Fork ascending buffering
/ Triple multiway valve
/ Quadruple multiway valve
/ Quintuple multiway valve
/ Widened / heightened load backrest
/ Widened fork carriage
/ Forks of other lengths
/ Full free duplex mast
/ Full free triplex mast
/ Integrated side shifter
/ Attachments of other specifications
/ Grammer MSG531 suspended seat
/ Dedicated lithium battery charger
/ Integrated fingertip control system including ergonomic armrests
/ Toolbox, folder

LITHIUM POWERED

LI-ION TECHNOLOGY

INNOVATIVE LITHIUM-ION

EMPOWER YOURSELF WITH THE BEST



V80 LITHIUM ION

POWER THE POSSIBILITIES
RELIABLE LITHIUM-ION TECHNOLOGY

LITHIUM BATTERY ADVANTAGES

Long service life
4000 full charging cycles with at least 75% residual capacity.

Return on investment
Add flexibility to your operation,cost-saving in the long term, increased efficiencies.

Maintenance free
No topping up of water or checking acid levels.

High energy density
The high energy density of the Li-Ion battery ensures long working times and increases the high availability.

Cold area application
Li-Ion batteries maintain high performance at temperatures below freezing.

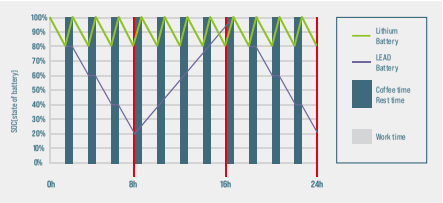
High safety and reliability
Intelligent battery management monitoring every important function, no emission of battery gasses.

Opportunity charging
Full performance during several shifts thanks to effective interim charging.

FEATURES & BENEFITS
THE HANGCHA DIFFERENCE

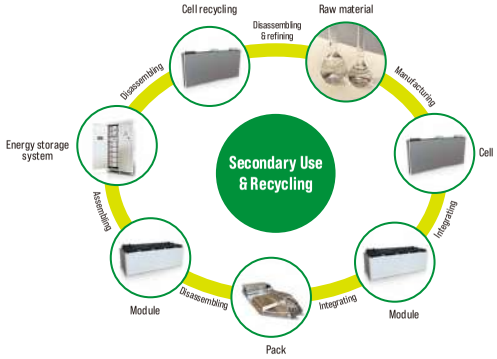
Efficiency

By quick opportunity charging any downtime, such as a lunch break, can be efficiently used and the battery is recharged in a very short period of time. Interim charging does not affect the battery service life.



Safety

/ Intelligent battery management monitoring every important function.
/ Higher user safety, thanks to acid-free use.
/ User friendly due to avoided battery change.
/ No emission of battery gasses.



QUESTION 1

Q: What are the characteristics of lithium batteries, especially when used in high and low temperature environments?

Charging temperature:	-30℃~65℃
Discharge temperature:	-30℃~65℃
Storage environment temperature:	-30℃~65℃

After the truck key switch is closed, the instrument battery condition needs to be checked:
1. Confirm that there is no battery system alarm message on the instrument panel.
2. Please check the remaining power before use. It is recommended to use the SOC between 50% and 100%.
3. If the SOC is lower than 20%, it is not recommended to continue using it. Please charge it as soon as possible.

QUESTION 2

Q: What is the charging time and usage time calculation of forklift lithium battery?

1. Available power of lithium battery (kWh) = rated voltage × rated power × 90% (To avoid over-discharge damaging the battery, the forklift is equipped with low power protection (less than 10%)).
2. Charging time (h) = rated capacity of lithium battery (Ah) × 90% ÷ charger output current (A).
3. The power consumed for charging (kWh) = the available power of the lithium battery ÷ 93% (the charging efficiency of the charger is calculated as 93%).
4. Usage time (h) = available power of lithium battery ÷ energy consumption data.

For specific energy consumption values, please refer to the technical table on the sharing platform.

QUESTION 3

Q: How does Hangcha BMS work to ensure the safety of the lithium battery?

HANGCHA BMS (battery management system) can monitor the cells at all times. As a result, hangcha lithium power is the reliable solution.

Battery Safety Management:
Overcharge/over discharge protection
Overcurrent/over-temperature/low- temperature protection
Multi-level fault diagnosis protection
Double fault monitoring

Battery Parameter Detection:
Battery voltage detection and analysis
Battery current detection and analysis
Battery temperature detection and analysis

Equilibrium Management:
Equalization based on voltage mode
Equalization based on time mode
Equalization based on battery cell SOC
Active/passive equalization optional

Other Features:
Low cost,low power consumption
Historical data record
Flexible cascade expansion
CRC data validation
